About Me

Hi, I'm Harshil — a tech enthusiast who brings ideas to life through code.

With a keen eye for detail and a hunger for innovation, I turn challenges into opportunities. From web development to creative problem-solving, I'm always eager to learn and contribute to meaningful projects.

Career Objectives

My Passion for Technology

From a young age, I've been fascinated by how technology transforms lives. This passion led me to pursue a diploma in engineering focused on software and web development. I enjoy understanding how websites are built, how design interacts with code, and how digital tools shape experiences.

Current Learning & Internship

I am currently in my third year of diploma studies and gaining real experience through an internship at V2V Class. Here, I work with HTML, CSS, and Bootstrap to build real pages. It has taught me teamwork, deadlines, and creative thinking — all essential for the future.

Future Goals & Vision

My long-term goal is to become a skilled full-stack developer. I want to work on impactful projects, learn modern frameworks like React or Vue, and even contribute to open-source. I believe that tech can change the world — and I want to be a part of that change.

Strengths & Personal Qualities

I believe in consistency, adaptability, and staying calm under pressure. I enjoy working in teams, sharing ideas, and supporting others to achieve a common goal. I take feedback seriously and use it to grow.

My strengths include clear communication, time management, and a strong desire to improve my skills every day. I approach challenges with a positive mindset and treat every task as an opportunity to learn something new.

Soft Skills & Hobbies

★ Soft Skills

- 🔧 **Problem Solving** - I enjoy understanding problems and finding clear solutions.
- 👑 **Leadership** - I stay calm and responsible, especially when working in teams or during pressure.
- 💡 **Creativity** - I like thinking differently, especially when designing or building something new.

🎮 Hobbies

- 🎧 **Listening to music** - Whether focusing or relaxing, music is always with me.
- 🌿 **Exploring nature** - I enjoy visiting peaceful natural places that recharge me.
- 🏏 **Playing cricket & offline games** - It helps me stay active and enjoy time with others away from screens.

💡 A Bit About My Personality

I'm usually calm, thoughtful, and quiet — but once something starts going wrong too many times, my patience wears thin. I'm not someone who reacts loudly, but I do respond when things feel unfair or repetitive.

I prefer doing things properly the first time. Whether it's a small routine or something creative, I like structure — and I get irritated when things get messy or slow without reason.

Outside of tasks, I'm lighthearted and like to joke around. I usually stay cheerful and enjoy keeping things fun with people I'm comfortable with. At first, I might seem reserved around someone new — but once I get to know them, I naturally open up and become very friendly.
